

Katch Kan emerged in 1994 in response to the environmental challenges in the energy sector, its Rig Safety System(RSS™) and Zero Spill System (ZSS™) assist sustainable development by protecting and preserving the land, water and personnel in the oil and gas industry. These innovative systems work together to optimize the health and safety of those involved in upstream oil and gas projects, while minimizing pollution and maximizing operational results. Katch Kan™ systems enable oil and gas exploration to occur in a proactive and eco-efficient manner. By using our systems, Operators and Contractors can turn any drilling or work-over rig into a zero spill environment, and minimize the waste of expensive drilling fluids, resulting in a cleaner, a safer and more productive working environment. Katch Kan builds these systems under ISO 9001 and 14001management systems and operates a full service field operation in Canada under COR guidelines. Katch Kan is a global leader in reducing environmental footprint and operational safety in the oil and gas drilling industry with 90% presence in the Canadian Market and this innovative technology has been adopted in over 60 countries worldwide.

Abbas Al-Saigh, Ph.D., P. Eng.

V.P. Business Development
Middle East & North Africa

- Petroleum (B.Sc.) and Chemical (M.Sc., Ph.D.) Engineer.
- Joined Katch Kan Ltd. as a V.P. Business Development MENA region in January 2012, to date.
- Over 12 years of Petroleum Industry experience, with the major oil sands plant at Syncrude Canada Ltd., and with Kuwait National Petroleum Co. (KNPC) at the Shuaiba Refinery.
- Over 20 years of International Marketing of Petroleum Equipment, Services, and Technology, including Training and Education.
- Agent of Qatar Petroleum in Canada and USA for Training and Education since year 2000 to date, coordinating the Education program for their sponsored students.

Founded in 1911, SNC-Lavalin is one of the leading engineering and construction groups in the world and a major player in the ownership of infrastructure. From its offices in over 40 countries, SNC-Lavalin provides EPC and EPCM services to clients in a variety of industry sectors, including mining & metallurgy, oil & gas, environment & water, infrastructure and clean power. In many cases, SNC-Lavalin combines these services with its financing and operations & maintenance capability to provide a complete end-to-end project approach.

SNC-Lavalin maintains exceptionally high standards for health and safety, ethics and compliance and environmental protection, and is committed to delivering quality projects on budget and on schedule to the complete satisfaction of its clients. With projects in some 100 countries, SNC-Lavalin generated C \$8.1 billion in revenues in 2012, of which some 62% was generated from its Canadian base right across Canada. SNC-Lavalin's 18,000-strong Canadian employment base of high-value added engineering and technical expertise is headquartered in Quebec (6,400) but is also based in Ontario (5,100), Alberta (4,000), British Columbia (1,500) and in the rest of Canada.

Another 14,000 highly skilled people work in Latin America, Europe, Asia, the Middle East and Africa.

Sam Boutziouvis was appointed Vice-President, Government Relations and Multilateral Development Institutions for SNC-Lavalin Group Inc. in December, 2012. He reports to Erik Ryan, Executive Vice-President, Strategy, External Relations and Marketing.

In his position based out of Ottawa, Sam is responsible for senior SNC-Lavalin relationship management with the Government of Canada. He works with SNC-Lavalin senior management and with SNC-Lavalin product business units to help secure essential political, diplomatic, public service and crown agency (EDC, CCC) support for the company's domestic and export market expansion. He represents the corporation by maintaining ongoing relationships with [federal government officials and political leaders](#), multilateral development institutions and national and international industry associations.

Sam's 20-plus years of experience with the Canadian Council of Chief Executives (a CEO-based public policy advocacy organization) will assist in these tasks. Over his career with the Council, Sam held positions of increasing breadth and responsibility and was Vice-President, Policy, with a focus on international and fiscal issues for several years. Prior to that, he was a senior analyst with the Gas Exports Division at the then-called Department of Energy, Mines and Resources with the Government of Canada.

Sam is a graduate from Carleton University (MA in Public Administration), University of Ottawa (undergraduate degrees in Economics and Biochemistry) and the University of Western Ontario (Executive Program).

Sonoro Energy Ltd.

Sonoro is an international bitumen exploration and development company. Our current focus is a pure play on asphalt resource exploration and development in Iraq.

Sonoro has initiated the evaluation of resource opportunities under our asphalt license agreement in the Salah ad Din Province.

Richard Wadsworth Chairman & Chief Executive Officer

Mr. Wadsworth has more than 20 years of successful experience in developing unconventional resource projects. He has been involved in various projects where there was little production, poor infrastructure or markets for bitumen, growing them into significant assets through his vision and operational strengths. He was Co-Founder, President and COO of Bankers Petroleum Ltd. (“Bankers”), an oil and gas exploration, development and production company listed on the TSX & AIM, from its inception in 2004 until August 2008. During this period, he led Bankers in re-developing its bitumen field, building a comprehensive team, the necessary infrastructure and external relationships resulting in reserves growing to over 150 million barrels and production from 500 bopd to over 6,000 bopd.

Mr. Wadsworth previously led and managed a joint venture company for the initial exploitation of the current Bankers oilfield in Albania on behalf of Premier Oil Plc

and its three international E&P partners. Previously, he held various roles within Koch Petroleum Canada over 9 years mainly in the bitumen sector.

Mr. Wadsworth holds a Chemical Engineering degree from the University of Calgary, and is a registered Professional Engineer with APEGA.

Westdev International

Westdev is an international business consulting firm specializing in direct investment and joint ventures.

Westdev has over two decades of success working with Canadian companies to expand their operations to numerous international markets.

We work with Canadian companies, particularly those in the energy industry, to locate and develop suitable business and project opportunities, and viable partners in the Middle East

Our services include screening prospective companies to ensure they meet the needs of our clients, introductions and follow-up meetings, advice on cross-cultural business issues, and works with local companies and government ministries, embassies, and other agencies.

We also work with companies in the Middle East who seek foreign companies as suppliers and for their expertise. Westdev also works closely with all government bodies.

Mrs. Sandra LeBlanc, for the past twenty years, has held various directorships, executive, management and in-house consultant positions in private and public international energy companies, both upstream and downstream. Her expertise is, working with the technical team, for the acquisition of commercially viable international assets. This includes a process to identify, evaluate, source human and financial capital, recommend and oversee the implementation of the non-technical aspect of international energy related projects.

Mrs. LeBlanc has worked on projects with an investment value of \$1mm to \$1.2 billion dollars, throughout the Middle East, North Africa, West Africa, Latin America, the Former Soviet Union and Asia.

Sandra LeBlanc is a Canadian citizen, born in Canada and resides in Calgary, Alberta Canada.
