Strategic sector

Agriculture

Past

Present

Future

GLOBAL PROBLEMS

POPULATION GROWTH

2 Billion People

Suffer micronutrient deficiencies

CLIMATE CHANGE

25% of all farmlands are already rated as highly degraded.
Rise in frequency of droughts and floods, all of which tend to reduce crop yields.

NATURAL RESOURCES

FOOD WASTE

Between 33% - 50% of all food produced globally is never eaten.

Source: The World Government Summit 2050 Projections, "Agriculture 4.0: The Future of Farming Technology"

PROBLEMS IN AGRICULTURE SECTOR IN TURKEY

High average age
of farmers

Climate change and
inefficient cultural
practices

Efficiency problems
of agricultural
inputs

Foreign dependency
in energy, fertilizers
and pesticides

Lack of usage of
modern techniques

WHAT IS IZMIR AGRICULTURAL TECHNOLOGY CENTER?

ITTM is the open innovation environment where information technologies in agriculture based technologies can be produced, tested and developed on real users and products in a real life environment.

AGRICULTURE IN IZMIR

Agricultural Area: 3.3 Million Decare

of Agricultural Enterprises: 155k

Agricultural Production Value: 18 Billion TL

Agriculture Based Export: 3.2 Billion \$

Agricultural Population: ~13 %

What are the advantages of ITTM being in Izmir?

Agricultural
Potential

High potential of
agriculture and
agro-industry

Focus of
Science

Universities and
Technoparks

Population

3rd biggest
province in Turkey

Open
Interface

Port city, easy
transportation,
attractive for
entrepreneurs
and startups

Development
Policies

Compliance with
sustainable
development
policies

COLLABORATION OPPORTUNITIES

Agriculture Based Specialized Organized Industrial Zones

- Dikili (Greenhousing)
- Bayındır (Cut flowers)
- Kınık (Medicinal and Aromatic Plants)

GOALS

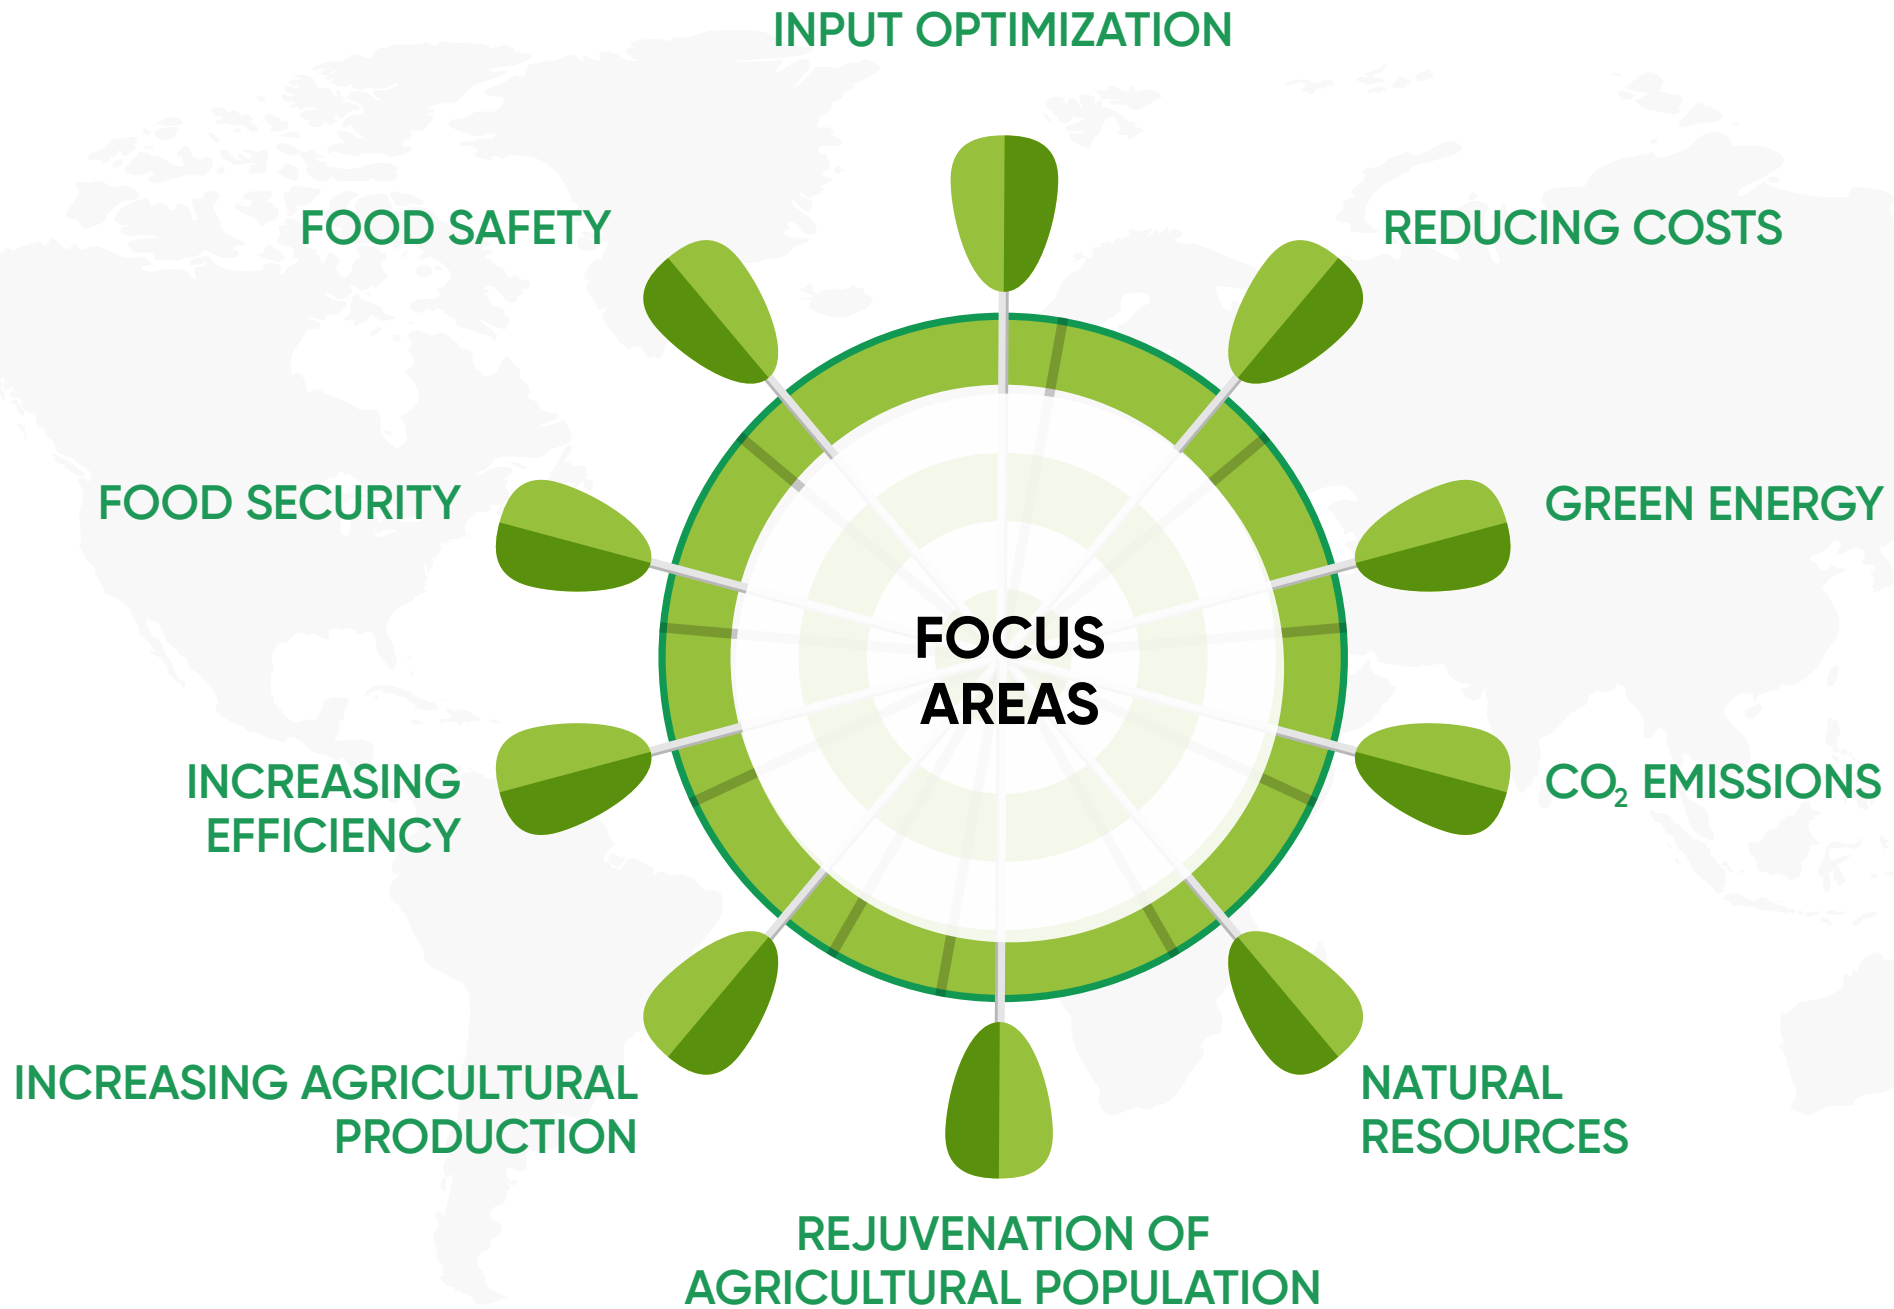

Bringing sufficient research and innovation infrastructure to the ecosystem

Increasing the number of competent human resources in agricultural information technologies

Supporting the commercialization of agricultural technology research

Facilitating access to finance for agricultural entrepreneurs

Increasing the attractiveness of the agricultural sector for young people

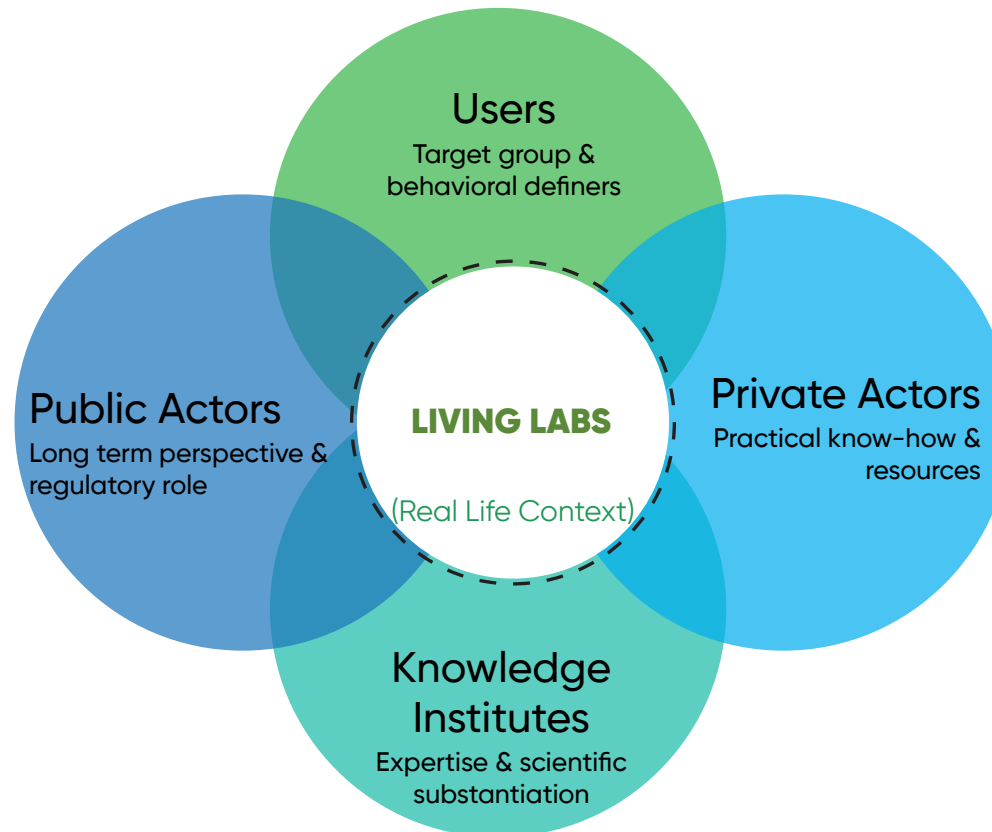

WORKING MODEL

Living Lab

Living Lab is a research concept.

Living lab is a user-centered, open innovation ecosystem that often operates in a regional context, integrating simultaneous research and innovation processes in a public - user - private sector - knowledge organizations partnership.

It is an experience center where the outputs of research and development activities can be tested and applied in real life environments and with real users.

STAKEHOLDERS

Chambers / Commodity
Exchanges, Unions,
Associations, Non-
Governmental Organizations

Producers, Private Companies,
Producer Associations,
Cooperatives

Universities, Institutes and
Research Centers

Public Institutions and
Organizations, Municipalities,
Technoparks

APPLICATION AREAS (MENEMEN)

TAGEM
AR-GE & İNOVASYON

Republic of Turkey Ministry of
Agriculture and Forestry

International Agricultural
Research and Training Center

- Entrepreneur Offices
- Data Acquisition Lab
- Data Analysis Lab
- Prototyping Lab
- Monitoring in Cultivated
Lands
- Meeting Rooms

ITTM
İZMİR AGRICULTURAL TECHNOLOGY CENTER

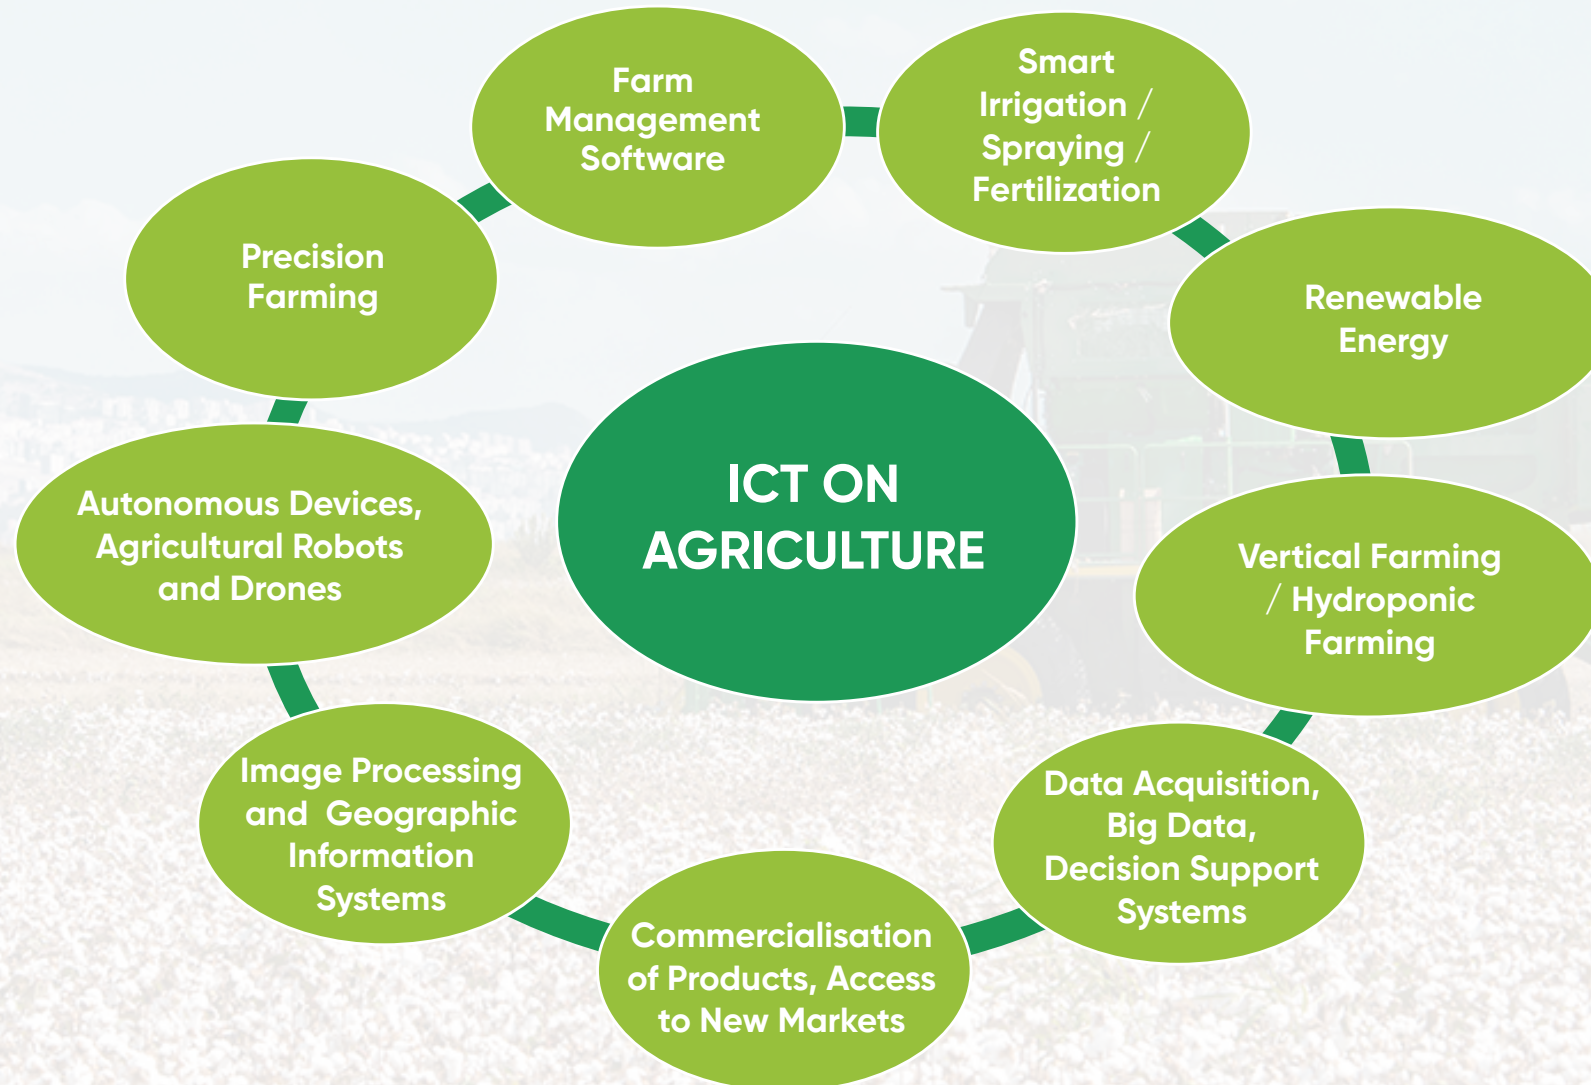

OFFICE SPACES (KONAK – MENEMEN)

City Center

- Management Offices
- Meeting Room

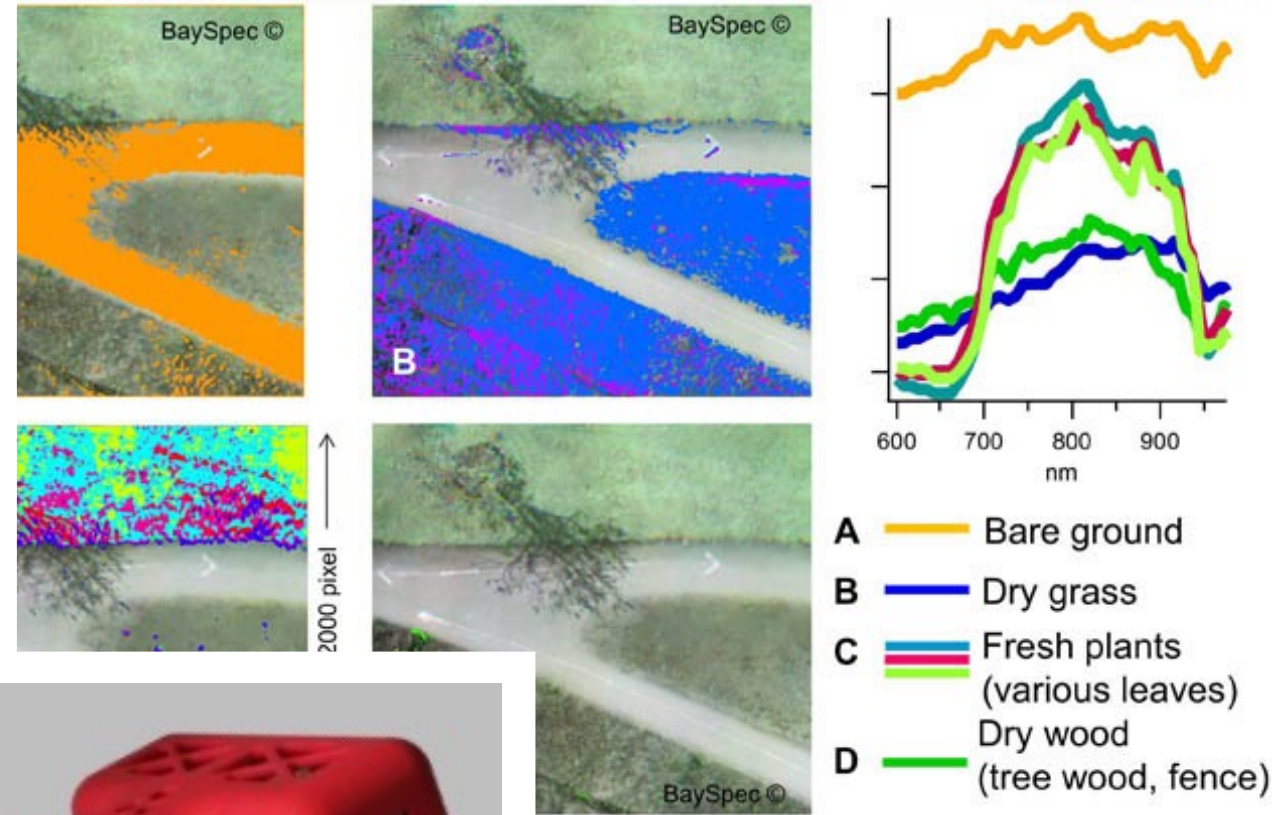

FIELDS OF TECHNOLOGY

EXAMPLE USE-CASES

Hyper/Multi Spectral Imaging

Precision farming applications such as detection of plant diseases and pests, yield estimation etc. with special (hyper - multi spectral) cameras that can collect data at spectrums invisible to the human eye

EXAMPLE USE-CASES

Drone

Field monitoring, husbandry monitoring,
plant disease detection and input
spraying

EXAMPLE USE-CASES

Autonomous Devices

With the operation of agricultural machinery (tractors, harvesters, etc.) autonomously and with GPS data, increased productivity and precision, cost, pesticide, seed and chemical reduction, more effective and efficient harvesting.

MAIN FIELDS OF ACTIVITY

AGRICULTURAL NEEDS
ASSESSMENT AND
PROJECT MANAGEMENT

TRAINING AND
CONSULTANCY

TECHNOLOGY
SERVICES

INCUBATION AND
ACCELERATION

PROJECT PARTNERS & PARTNERSHIPS

Republic of Turkey Ministry of Agriculture and Forestry
